

May 20, 2010

Dear Dr. Dusit Charern,

I am deeply grateful that you have chosen me for your scholarship. Having this support will absolutely impact my future and lift a huge burden from my life. I'm writing this letter to thank you. This is a very exciting opportunity for me.

With your support I can focus more on taking classes that will benefit me without finances being the major deciding factor. Before the scholarship I had only the resources for taking the minimum programming classes required for the degree I was seeking. With this scholarship I can pursue more of the advance programming classes I am interested in. In addition to the scholarship I look forward to any guidance and advice that you may offer me.

As for my future at UAH, education will be my primary concern. Programming will be a fundamental part of any career that I will pursue. I hope that some practical experiences such as an internship will help me define my career goals.

My family is very proud of my achievement and thankful for your generosity. My mom considers this to be a great sign of success. I am happy to say that my cumulative GPA has reached the initial goal of 3.0 as of this semester. Now I understand a responsibility to all the people contributing to my successful future.

Sincerely

Kevin S. Gieger
